Springer, Netherlands, 2004. Hardback. Condition: New. 2004 ed.. Language: English . Brand New Book ***** Print on Demand *****. Portal hypertension is the most important complication of a great variety of both acute and chronic liver diseases. Nevertheless, hepatic cirrhosis is the most frequent cause of portal hypertension. Gastrointestinal bleeding due to rupture of oesophageal varices is, without doubt, the most severe complication of portal hypertension. At present, great advances are being made in the pathophysiology and in the development...

Reviews

This book is definitely worth acquiring. I have go through and so i am certain that i will likely to read through again again in the future. Its been printed in an exceptionally basic way in fact it is only after i finished reading this publication in which actually altered me, change the way in my opinion.
