This, however, is not the equation of the older school, interesting as that puzzle was to most students and profitably as it may therefore be used as drill material; it is now the real equation, introduced naturally and used with a definite purpose. Following this work there naturally comes the graph of the formula, and thus the graph becomes something more than a mere picture of statistics of population of a territory or of the attendance in a school. If the graph is a curve, this curve may drop below zero, and hence the negative quantity enters naturally and tangibly. In a half year, therefore, the student comes to know the nature of and the uses for the four great features of elementary algebra, --the formula, the equation, the graph, and the negative number. He may know nothing of algebraic addition, or of...
